

GrooveTrip FM Transmitter Operating Instructions

Thank you for purchasing Cygnett's GrooveTrip FM Transmitter. Now you can transmit music from your MP3 player to your car or home stereo.

Contents:

- 1x FM Transmitter
- 1x 12v Car Cigarette Lighter Adapter
- 1x 12v Car Charger Adaptor

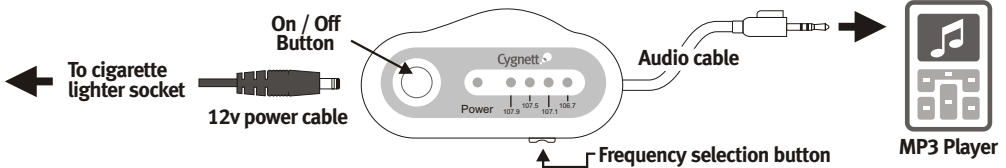

For product support, check the latest instructions & updates in the Support Section of our website: www.cygnett.com or email us at info@cygnett.com

Step 1

Connecting & Powering the Transmitter

Unclip the audio cable and plug into the headphone socket of your MP3 player.

You have two choices of how to power your GrooveTrip. One way is with 2 x AAA batteries. The other is via the 12v Car Power Cable provided. To power via the cable, just plug into your car's 12v cigarette lighter, and the smaller end into the side of the Groove Trip. When the power cable is plugged in, the batteries will not be used.

Button Down
for ON

Button Up
for OFF

Step 2

Tuning

Turn on your FM radio tuner and adjust/tune into each of the 4 preset frequencies until you find the clearest (least used) frequency. Turn on the transmitter or plug in the power cable (The red LED will light up).

Switch the frequency selection button to the frequency you have chosen on your radio. The green LED will indicate the selected frequency. Your music will now be played through your FM radio.

Hot Tips

- Try different frequencies to determine which has the best sound.
- If you are experiencing static or distortion, adjust the volume on your MP3 Player to achieve the best results.
- You may wish to adjust the settings on your MP3 Player so that the screen is always backlit for strongest and most stable FM signal. Please refer to your unit's manual for notes on how to do this.

Cygnett 5 Year Manufacturers Warranty • Register online at www.cygnett.com to activate your warranty.

This device complies with Part 15 of FCC Rules. Operation is subject to the following conditions:
